Depth of Threshold	

A _____

+ E _____

Total Rise = _____

DiscountRamps.com LLC, along with most regulatory agencies recommends 1-foot of ramp run per inch of rise in height (12:1 ratio). For example, if a porch and steps have a total rise of 20 inches, then a ramp with a 20 foot run would be required. Please note that this does not include any platforms that may be necessary for the ramp system.
